Competitions

Waterloo CCC 2024
Honor roll

Nasa Space Apps Challenge
Global Nominee

Starter Hacks
Won Most Promising

Scrapyard Toronto
Organizer & Developer

Technical skills

Technologies: Development:

React	Git / Github
Express	Figma
Nextjs	Terminal
Tailwind CSS	VSCode
Svelte	Excalidraw
PostgreSQL	Vim Motions
MongoDB	PSQL
ThreeJS	

Education

Scitech Program at
Chinguacousy Secondary
School 2026

FRC Robotics Colead

Member of Film Club

Honor Roll

Hobbies

Badminton
Card & Board games
Music production

About me

I'm a hobbyist programmer specializing in web technologies who recently became interested in understanding the ins and outs of memory and software. Currently, using vim on a Chromebook.

Projects

<https://pixili.netlify.app/>

My project, Pixili, is a browser based graphics creation software. The Highlights of my project are:

- cursor zooming
- recursive fill algorithm
- and file saving

easy-todo

I developed easy-todo a extension created for the code development software VSCode.

- JSON based data saving
- Todo - Doing - Done Strategy
- Prioritization options
- Use of VSCode extension API

Pentagon

A physics simulation supporting convex polygon and circle rigidbodies.

- Velocity
- Collision Resolution using Separating Axis Theorem
- Friction
- Both polygon and circle collisions
- <https://fadedbronze.github.io/pentagon.js/> (copy paste link pages link)

Open Source

Implemented a drop down menu in the graphite graphics editor. This drop down made choosing nodes in the node editor more easy.

- Search Titles
- Close / Open Dropdowns
- Hosted at <https://editor.graphite.rs/>
